

Sector have won
their first order for
Grade 3 and Grade 1 versions
of FRAPP from a highly regarded
Special Force in South East Asia

SPECIALIST POLICE AND MILITARY TRAINING FACILITIES

The Sector Associates team has 25 years experience in planning, designing, building, equipping, testing and maintaining a wide variety of tailor-made military, police, special-forces and civilian training facilities in over 40 countries.

Sector Associates skills cover all types of weapon, explosives, assault, mock up and parachute training facilities.

Our comprehensive range of specialist services include:

- Master planning
- Development of unique design solutions
- Design specifications and cost estimation
- Tender preparation and appraisal
- Supervision of specialist construction
- Test specifications and live fire testing
- Investigation of range failures
- Maintenance planning and range orders

Sector Associates are proud to introduce

FRAPP CLOSE QUARTER BATTLE PARTITION SYSTEM

- No bolts or screws required
- Erected walls completely self-supporting
- Strong enough to withstand MOE attack
- Cheaper, lighter, non-bulletproof panels available
- Proofed up to 5.56mm

Sector Associates have specialist expertise in delivering versatile, bespoke solutions based on unparalleled understanding of the training requirements.

- small-arms shooting ranges
- close-quarter-battle (CQB) buildings and urban complexes
- interactive video ranges
- partition ranges
- method-of-entry (MOE) and assault buildings
- live fire mock-ups
 - aircraft,
 - helicopters
 - ships
 - overground and subway trains
 - oil-rigs
- abseiling/climbing structures
- parachute training structures

Sector Associates also provides all the conventional supplementary skills such as architecture, civil, structural, ventilation, electrical, environmental and acoustic design. We are constantly researching and testing new materials for bullet and blast protection systems; this combined experience is now available to provide unique independent advice to governments, police forces, special-forces, consultants and contractors enabling them to build new or upgrade their existing facilities to achieve safe and flexible training.

'Our corporate aim is to design for our clients' specific threats, economically and flexibly'

Barrie Pegrum

Founder of Sector Associates

Working with us

Sector can assist in developing the Training Needs Analysis (TNA), or if it is already prepared, we can tailor our role to suit any scenario for our clients. The key to any project in this field is getting it right from the very start and this requires a thorough understanding our clients' objectives. These objectives are the foundation upon which theTNA is based. Sector bridges the gap between highly specialised operational forces and the expert multi-disciplinary design team.
